Description

BLOCK3D is an addictive, fast-paced puzzle game for any gamer. With a style placed firmly between a quick-action puzzle game and a game of collapsing blocks, this game provides unlimited combinations and strategies.

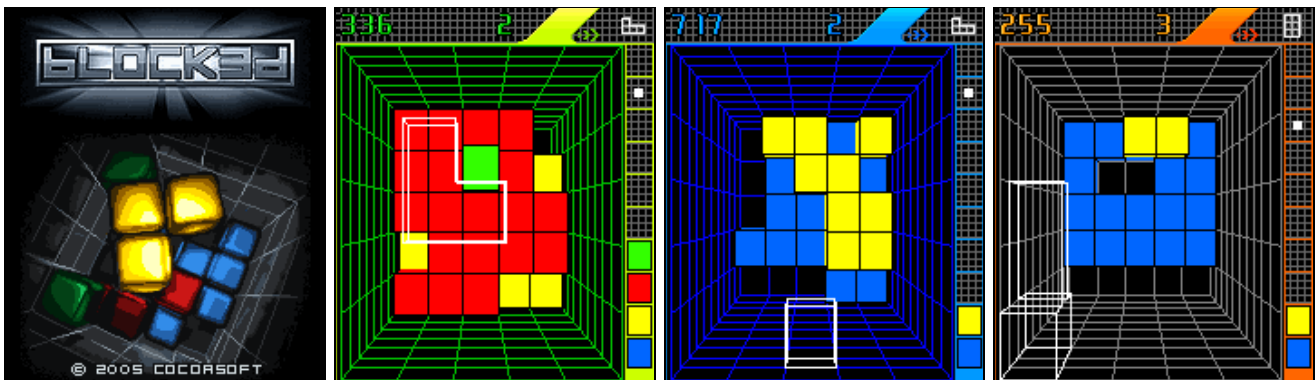

The player must rotate and position different odd-shaped blocks into a pit, dropping them so that the pieces interlock. When a level is filled, the blocks within it are removed, giving space to new pieces. The longer the game lasts, the faster the pieces fall, until no room is left to manoeuvre. BLOCK3D is played in three dimensions and is played from a top-bottom perspective. Pieces can be rotated around three axes. The basic mode uses standard blocks, which can be manipulated with three different degrees of rotation, in two directions. Further modes - extended and expert - introduce extra blocks, with great variations in both size and shape, to the game. Naturally, all these features add to the complexity and challenge, thus providing endless hours of playing for both, casual and veteran players.

An intuitive and modern interface offers the player easy navigation within the game. After completing the game, the player gets the opportunity to classify for the top 5 ranks. The high scores are kept separately for each playing mode, thus providing the player with comparable game progress results. The game also offers the player several colour schemes so he can set the gameplay to his likeness.

The game is accompanied with a likeable soundtrack consisting of several fast paced music tracks that add fun and enhance the action feeling. The music is also adapted to the player's actions and the game's overall progress.

BLOCK3D is a timeless classic with a high replay value and is packed with both fast action gameplay and mind overwhelming puzzles, which will keep the player's attention and fun on a high level.
