

## CarRacer3

## Description

CarRacer 3 challenges gamers to spill their revenge on rush hour traffic, vindictive rival racers and anything else that gets between them and the finish line. Various locations provide a visually rich environment full of nasty surprises and bonus rewards.

Aside from the usual pitfalls of arduous racing, the player must overtake a number of racers, who want to win at all costs. But in these challenges there is far more at stake than merely winning the race ... Like a gladiator of contemporary times, the player must face off death amid a screech of tires and the throb of engines that was never this intense ...

The player gets the chance to drive one of the fastest racing cars available to top racers. He will race against time and uncompromising rivals. In order to win the campaign, the player must win each race and excel himself at driving abilities. Racing events take place on different locations over Africa and Europe, including:

- the desert roads surrounding Cairo, the land of Nile and suburban Alexandria
- the French Riviera, Italy and Monaco
- forest roads in the Swiss Alps and Schwarzwald in Germany
- the wilderness of Norway and Finland.

Diverse and colourful surroundings with plenty of detail present immerse racing levels, while every track features different obstacles, speed ups and bonuses which aid the absorbing game play.

The game is accompanied with the distinctive CarRacer theme and the fast paced background music score, which changes throughout the race. Sound effects for sliding, acceleration, damage and many more, will provide valuable racing feedback to the player.

The player must show a great deal of racing abilities and control his reflexes in order to gain every second of advantage. Prior to every race, he can repair and upgrade his vehicle, thus adding to its speed and manoeuvrability.

Like the player, his opponents will also improve with each race and they will also upgrade their racing cars with new tires and engines, thus making themselves tougher to outrun in the forthcoming races. The player's adversaries will use shortcuts and like the player pick up any bonuses they encounter and use it to their advantage.
